

Route 40 and Route N Interchange

Project Description

MoDOT is constructing a new Rte. N interchange and removing all the at-grade crossings on Rte. 40 from west of Winghaven/Route DD to east of Lake St. Louis Blvd.

The traffic signal at Rte. 40/N will be removed. The new Rte. N overpass will be west of where the existing Rte. N intersection is now.

Outer roads will be built with this project, and eventually part of the westbound Rte. 40 lanes will become part of the outer road. The eastbound lanes will be reconstructed as well. When this project is complete, Rte. 40 will be upgraded to interstate standards (I-64).

The project will also accommodate and tie into the future Rte. 364 extension (Phase 3). The \$26 million project is expected to be complete by late 2005.

-  Roadway to be removed
-  Relocated Rte. N
